

Click on a link to attach a file:

Subject: |

 [Attach a file](#)

[Rich formatting »](#)

Immediately a file location and browse button appear:

Subject: |

 [remove](#)

[Attach another file](#)

You can click the [Attach another file](#) link to add another attachment browser.

Subject: |

 [remove](#)

[remove](#)

[Attach another file](#)

Clicking the remove link will remove an attachment browser.

This should all be done using DHTML (JavaScript) so it is in real time on the client machine, not the server.

Use PHP to upload the files.
